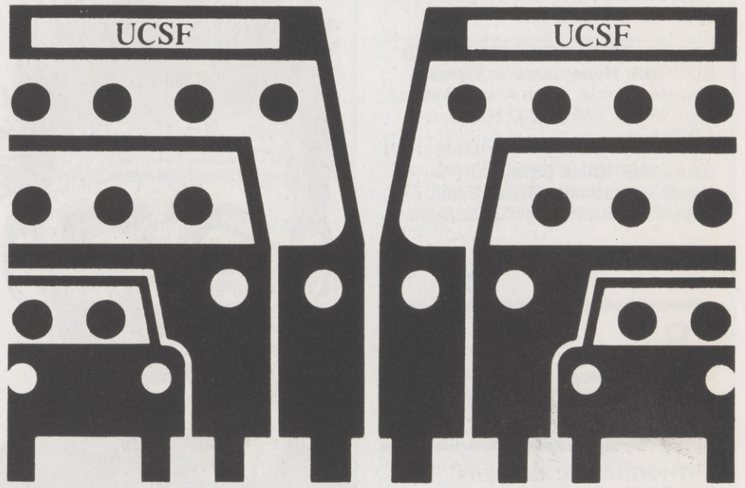
UC-San Francisco's Family Practice Training Program at Community Hospital in Santa Rosa was honored by the University at a special symposium and reception in early November.

The program, sponsored by the School of Medicine, paid special tribute to Community Hospital's 90 graduates, over half of whom have remained to practice medicine in Sonoma County. It honored the late George Firestone, who was instrumental in bringing the family practice program to Community Hospital. All medical school alumni from Sonoma, Napa, Lake, Mendocino, Humboldt and Del Norte counties were invited to the event.

Keynote speaker at the symposium was John Geyman, chairman of the Department of Family Practice at the University of Washington and a former director of the Community Hospital's family practice program, who delivered the George Firestone Memorial Lecture. Chancellor Sooy and Dean Krevans also spoke.

The Family Practice Program, according to Dean Krevans, trains young physicians for rural practice, in hopes that they will decide to become modern country doctors, able to treat a wide variety of illnesses and to evaluate their impact on the patient and his family. Currently there are 28 residents in the program.

The program has received recognition for its excellence through federal health manpower grants and California Health Manpower Policy Commission funds. Last year 250 physicians applied for the nine positions open for residents. Clerkships for third and fourth year medical students are booked two years in advance.



The latest steps taken in response to the recommendations of the Chancellor's Emergency Task Force on Personal Safety are:

SHUTTLE SERVICE

- The Center for Educational Development (CED) located at 1855 Folsom St. has a new shuttle service to the 17th and Folsom parking lot, the BART station, parked cars, homes and bus stops within a one-half mile radius. It operates 4-6 p.m. and will continue through the winter months. For further information call x2566.
- On the Parnassus campus, two Night Security Shuttles, serving the campus community and visitors, will continue to operate seven nights a week, 5:30 p.m.-2 a.m. One travels in a North/South direction, the other East/West. They leave approximately every 15 minutes from the front doors of Moffitt and the bus shelters at Langley Porter, the new School of Dentistry building and the H level of MU garage, and transport people to the garage, public transit stops, homes and parked cars within the areas bordered by Clarendon, Clayton, Golden Gate Park and Ninth Avenue. The pick-up point on Ninth Avenue is in front of the "Donuts & Things" shop at the corner of Judah. For further information call x1414.

POOL-IT

- All employees, including those working evening and night shifts, who are interested in forming van and car pools, should contact Jim Wood, x1511. A transportation representative is available to discuss at staff meetings the benefits of pooling.

Applications to join the National Honor Society of Nursing, Sigma Theta Tau, Alpha Eta Chapter, are now available from Joyce Wickett, 319 N. Qualifications are: 1) undergraduate students — completing one-half of the curriculum with a GPA of 3.3 2) graduate students — full-time completing nine units with a GPA of 3.5; part-time completing 22 units with a GPA of 3.5 and 3) RN's not currently enrolled in school are eligible if they have completed at least a baccalaureate degree, and an active member of Alpha Eta Chapter submits a letter of reference.

The UC-Systemwide administration has allocated $1 million to the Intercampus Activities Fund. The fund supports various intercampus activities such as one-time faculty visits, graduate student exchanges and some joint research/graduate instruction. An advisory committee has been set up to review requests up to $100,000. For further information contact the Office of Academic Affairs, x1881.

A new shuttle service operates between UC-Berkeley and UC-San Francisco. It leaves UCSF from the bus shelter on the Northeast corner of Third and Parnassus at 8:15, 9:50, 11:30 a.m., 1 and 3 p.m., and departs from UC-Berkeley from the bus shelter on the west entrance from University Avenue at 9, 10:40 a.m., 12:15, 2 and 4 p.m. It makes no stops between the two campuses.

The shuttle costs $1 each way and carries 14 passengers on a first come-first served basis. UCSF faculty, students and staff will be given priority and will be able to reserve a space for their return trip from Berkeley. Passes also are available to departments in quantities of 10. For further information contact the Transportation Office at x1511.

The Academic Senate Committee on Research is accepting applications for a new category of research funds — Multiple-User Equipment Research Funds. Following are the criteria that apply to requests for this new kind of funding in addition to the criteria already established by the Committee on Research: 1) proposals should be from groups consisting of a minimum of three principal investigators and must fully document and justify the need for equipment to be used for a long period of time. In addition, each investigator must submit a research protocol; 2) It is anticipated that requests in excess of $25,000 will not be funded, but requests for matching funds will be considered; 3) proposals that are approved but not funded will be maintained on file for possible future funding.

In addition, the Committee on Research has increased the limit on funds for general assistance to $4,000 for the fiscal year 1980-81. Revised policies, procedures and applications are available from the Academic Senate Office, 101 S, x1307. Application deadline is December 5.

The 1980 Hitchcock Lecture will be held on Wednesday, November 19 at 3 p.m. in Room 664 Medical Sciences. Shmuel Winograd, an IBM fellow with the Mathematical Sciences Department, T.J. Watson Research Center, Yorktown Heights, N.Y., will present the lecture "Complexity of Computations: Why Are Computers Worse Than We Hoped?"

Winograd is a Permanent Visiting Professor at the Technion in Israel and was elected to the U.S. National Academy of Sciences in 1978. He began his appointment for the Fall semester as Hitchcock Professor at UC-Berkeley on November 3. His UCSF lecture is sponsored by the Section on Medical Information Science in the Graduate Division.

The Hitchcock Endowment Fund was established by the late Charles M. Hitchcock in 1885 and was greatly enlarged in 1930 by a bequest from his daughter Lillie Hitchcock Coit.

The 1980 Sokolow Visiting Scientist, December 1-6, will be Lloyd J. Old, MD, School of Medicine alumnus, class of 1958. Vice-president and associate director of research at the Memorial Sloan-Kettering Cancer Center and Memorial Hospital in New York, Old will lecture on "The Search for Cancer-Specific Antigens: Studies with Mouse and Human Cancers," Monday, December 1 at 2 p.m. in Cole Hall.

Old is an outstanding experimental investigator in the field of tumor-host relationships and was awarded the 1976 Rabbi Shai Shacknai Memorial Prize in Immunology and Cancer Research in recognition of his many outstanding contributions to the field of tumor immunology. He was among the first scientists to offer evidence for the ability of microbial derivatives to increase immunological responsiveness in a broad manner which heightens their resistance to cancer cells.

The Ethel and Jane Sokolow Memorial Cancer Endowment Fund was established in 1973 from memorial gifts given after their death in 1970.

Winner of the most recent campus blood drive raffle was Sandra Matthews, principal clerk at the Children's Renal Center. The prize, a $30 gift certificate to Scott's Seafood Grill, was donated by the ASUCSF. A total of 250 pints of blood were donated on October 13, representing an increase of 20% (41 pints) over the previous drive last May. The next blood drive is scheduled for Monday, February 23, 1981.

HONORS & AWARDS

G. Richard O'Connor, professor, Ophthalmology & director, Francis I. Proctor Foundation and **H. Dunbar Hoskins, Jr.,** associate clinical professor, Ophthalmology: Recipients of the American Academy of Ophthalmology's 1980 Honor Award for outstanding service to the profession.

Gerald A. Gellin, associate clinical professor, Dermatology: Awarded the Jean Spencer Felton Award from the Western Occupational Medical Association for excellence in scientific writing in the field of occupational medicine; elected President, Pacific Dermatologic Association, 1980-81.

IN MEMORIAM

Catherine E. Sheckler, an associate clinical professor, Family Health Care Nursing, School of Nursing when she left UCSF in 1973. A pioneering nurse-midwife, she helped lay the groundwork for the nurse-practitioner graduate program which began in 1972.

Mark A. Brown, lecturer, Restorative Dentistry, School of Dentistry. Was president of his 1977 UCSF graduating class and was the winner of the Milton F. & Mary L. Gabbs Award. He became a lecturer in 1979.

The UC-San Francisco Regional Poison Control Center at SFGH will remain open for an indefinite period of time due to funds from the S.F. Department of Public Health, according to Mervyn F. Silverman, MD, MPH, director of the department. An appeal is being made to Bay Area health directors, the California Occupational Safety and Health Agency (OSHA) and private corporations to provide funding to help keep the center going.

The Poison Control Center, under the direction of Theodore G. Tong, answers more than 60 calls daily on accidental poisonings and first aid information. The center can be reached at x2845. Outside of the Bay Area the toll-free number is 800-792-0720.

Employees who are eligible for life and health insurance benefits and who want to make changes on their plans must do so during "Insurance Open Enrollment." Forms, requesting health plan and life insurance changes, are available in each department and must be received in the Payroll Office (322 CED) or Personnel Office (U12) by Wednesday, November 26.

An information session on open enrollment will be held on Tuesday, November 18 from noon to 1 p.m. in 303 HSW. All eligible staff and faculty are invited to attend for a review of the insurance plans available.

Herbert D. Landahl, professor of Biomathematics and Biophysics, Department of Biochemistry, was honored by friends and colleagues at a retirement party this month. Landahl, who retired in June of this year, first came to UCSF in 1968 as a Visiting Professor from the University of Chicago. A research career award winner from NIH in 1962, Landahl is known for his work on removal of aerosols and vapors by the human respiratory tract, the biological effects of radiation, and other important contributions. He is presently president of the Society of Biomathematics and chief editor of the *Bulletin of Mathematical Biology,* the society's publication. He will maintain an office on campus and continue his research in mathematical formulation and analysis of biological and medical problems.
